

SmartCity® Software as a Service (SaaS) Hosted Applications for Business Flexibility

Allows for Easy and Cost Effective Implementation of smart card applications and systems. The widely acclaimed SmartCity Suite of Solutions is now available in a SaaS (Hosted) model, allowing you to get your smart card system up and running quickly with minimal hardware infrastructure and resource investment.

SmartCity SaaS (Hosted) Solutions

SmartCity SaaS (Software as a Service) is our new generation hosted solution that is simple to install, operate, and maintain. The SaaS model reduces the upfront investment without sacrificing any capabilities. This solution is ideal for a campus or business that wants to implement smart cards but may only require them for one department or group, or one application. Our SaaS model is scalable so it can accommodate any size installation.

Extensive Back Office Functionality

SmartCity core functionality (Back Office, Security, and Server functions) is housed at our facilities and can be securely accessed by system operators and cardholders worldwide, 365/4/7. This allows for an easy set-up with full system functions, including card management, account management, transaction processing, audit, and reporting. As an added bonus with SmartCity SaaS, on-going software maintenance and upgrades are handled by us.

Benefits of SmartCity SaaS

- Complete on-site system not required
- Minimum hardware investment
- Quick and simple to setup & maintain
- Instant upgrade option
- Choice of single or multiple SmartCity modules offers flexibility & future proofing
- Contact and contactless applications
- Full back end system including card issuance, transaction processing and reporting

SmartCity SaaS Applications : Start with one or more modules, add applications as your needs expand:

- **ePurse:** for purchases/payments in retail, vending, laundry, bookstore, copy, print, tuition, Includes dedicated purse(s) for specific use.
- **Meal Plans:** for all your meal and dining requirements
- **Secure Logon:** to PCs, networks and the internet: Provide a quick, simple and highly secure way to logon using a card
- **Password Wallet:** Stores multiple passwords securely
- **Door Access:** Access restricted areas quickly and securely.
- **Biometrics:** Provide additional security tier for logical or physical access. Biometrics stored on card so no privacy concerns
- **eTicketing:** Use your card to pay for tickets and load the tickets directly on your card to gain entry to events.
- **Loyalty:** Earn points while you shop. Configure different programs for each merchant or run campus-wide incentives. Rewards can be instant or accumulated.
- **Parking:** Pay for time at meters, pay and display systems or access to prepaid and gated/restricted areas
